EDUCATION

Southern Alberta Institute of Technology (SAIT)

Diploma, Software Development - GPA: 3.8/4.0

Calgary, AB

2024 – 2026

Relevant Coursework: Object-Oriented Programming, Web Development, Mobile Application Development, Database Programming, Cloud Computing, Software Security, Software Testing and Deployment, Software Projects: Analysis, Design, and Management

Mount Royal University

Bachelor of Science – Computer Science

Calgary, AB

2026 – 2028 (In Progress)

EXPERIENCE

Frontier Industries

Web Development Intern

London, England, UK (Remote)

Apr 2026 – Jul 2026

- Conducted a full audit across 5 pages, identifying and prioritizing 23 issues spanning SEO, performance, accessibility, and GDPR compliance, and documented the site's design token system to establish a brand baseline - delivered as a report signed off by the founder
- Rebuilt the website using Framer and TypeScript, redesigning all 5 pages and building a contact form, job application page, and admin dashboard with Supabase integration for managing news, listings, and applications
- Configured GA4 and Search Console for baseline metrics, then designed a 17-experiment Build-Measure-Learn roadmap grounded in audit findings, each written as a testable hypothesis

PROJECTS

HomeFull | Full-Stack Web Application | [GitHub](#) | [Live](#)

- Built a full-stack web application connecting homeless individuals with job opportunities, using Next.js, React, and Firebase for real-time data management
- Implemented search and filtering by city, skill, and shelter to improve job accessibility for users navigating housing instability
- Styled a responsive interface with Tailwind CSS and deployed the application on Vercel for public access

NomViet | Chữ Nôm Reference Tool | [GitHub](#) | [Live](#)

- Developed a Next.js and React reference tool for learning Chữ Nôm, the traditional Vietnamese writing system, backed by Supabase for character data storage and querying
- Built character exploration by reading, glyph, and stroke count to help learners navigate the writing system
- Implemented a translation feature converting Quốc Ngữ text into phonetic script with corresponding Chữ Nôm character candidates

Arc Wellness (Capstone) | Mobile Fitness Application | [Live](#)

- Contributed to Arc Wellness, a mobile fitness application built with React Native and Node.js that helps users set goals, build personalized workout routines, and track progress, as part of a 5–6 member multidisciplinary team
- Designed and implemented the profile page and its integration with the app's overall user experience, focused primarily on frontend development
- Collaborated on frontend-backend integration, including API connectivity and data management, contributing to AI-powered video analysis features for exercise recognition

Project 5: Multisensor Device | Embedded Systems Project | [GitHub](#)

- Built a multisensor monitoring device on an ESP32 using PlatformIO to continuously measure magnetic fields, sound levels, motion, temperature, and relative humidity
- Integrated a Hall-effect sensor and a passive infrared (PIR) sensor alongside temperature and humidity sensors for real-time environmental and motion detection
- Implemented real-time display of sensor readings with optional data logging for later analysis

LEADERSHIP & ACTIVITIES

Centennial High School Band

Section Leader – Percussion

Calgary, AB

Sep 2023 – Jun 2024

- Led an 11-member percussion section, ensuring consistent performance quality in sync with the conductor throughout the year
- Mentored 8 junior members hands-on, demonstrating techniques in real time and guiding them through practice to build their skills
- Performed in multiple events including the Winter Band Concert, Spring Festival Concert, Vic Lewis Trip Concert, Final Band Concert, and the school Graduation Ceremony

MegaHacks

Calgary, AB

MegaByte Hackathon - Project HomeFull (Team of 3)

Jan 2026

- Owned UI design and implementation across the entire platform, translating the team's job-matching concept into a functional interface connecting shelter residents with local employers
- Contributed to shaping the product direction through team discussions and ideation, helping define how the platform would address the shelter-to-employment matching problem
- Competed against 17 teams in a 2-day build sprint, placing close to the top 8 in a competitive field

MegaHacks and Cursor

Calgary, AB

Cursor Calgary Hackathon - Rezume (Team of 4)

May 2026

- Built UI across all pages except the account page, and led QA testing to ensure smooth, correct end-to-end user flows before submission
- Competed in a hackathon format requiring Cursor as the sole development tool, adapting to an AI-assisted coding workflow under time pressure
- Scored 75 against a top-8 cutoff of 80, competing against 37 teams

SKILLS & COMPETENCIES

Languages & Data: Python, JavaScript, HTML, CSS (Proficient) · TypeScript, PostgreSQL, C, C# (Intermediate) · C++, Java (Basic)

Frameworks: React, Next.js, Tailwind CSS (Proficient) · Node.js, Arduino (Intermediate)

Tools & Platforms: Git, Vercel, Framer, Supabase, PlatformIO, Espressif32 (ESP32) (Intermediate)

Interpersonal: Teamwork, technical communication, mentorship, problem-solving, analytical thinking

Languages: English, Vietnamese

AWARDS & CERTIFICATIONS

Team Award for Leadership, Resilience, and Community-Building - Centennial High School, 2024

Schulich Ignite Program Certification - University of Calgary, 2022

Git Essential Training - LinkedIn Learning, 2024

Learning Git & GitHub - LinkedIn Learning, 2024

Acadium Apprenticeship Certificate - Acadium, 2026
